

Boss Gaming

Telegram Contacts:

Liv3Lov3Di3 (CEO)

Sai_012 (Vice Prez / Head Developer)

The main goal of Boss Gaming is to offer the most sophisticated, rewarding, and sustainable gaming platform available on the Tron ecosystem. We have decided to step away from the norm of luck and probability Dapps, and instead offer players a platform built to play more exciting games based on skill and strategy. It's time to usher in a new era in gaming with PVP (player versus player) games that are more interactive, and more entertaining for users. We feel that PVP is the next step in gaming and we plan to focus on it heavily as we bring many new Dapps to this ecosystem. We promise to put the time and energy into only offering our users a quality and professional experience. All of our games and services will run on smart contracts including the presale.

Goals

1. Offer a truly PVP gaming experience, step away from gambling and invest time into developing games that people have only dreamed of being able to play. No more copies!
2. Drive the ecosystem in early stages by both creating some of our own flagship games never before seen, and mixing in some timeless classics as we go like chess, and other arcade style games.
3. a sustainable long term dividend pool. We hope to break the record for the largest div pool in all of tron, and also add our own method of sustainability to ensure a long lifecycle for the platform.
4. Offer fair opportunity for persons of any financial situation to play games, mine tokens, and make a passive income in multiple ways.
5. We won't stop until were #1 Dapp Platform of 2020! And maybe not even then!

Milestones

Begin presale around new years!

We aim to begin our pre-sale around new years, things are going well with our smart contract development, and the first Dapp will be ready for Beta test in a few weeks time, so Pre-sale will be held to help fund the time, effort, and money it took to make all of this possible, and 25% of presale fund goes directly to the Boss Royal game feed contract, so enjoy! :)

Beta testing in January

In the month of February, we will begin beta test stage for our VIP group members. We'll find out if everything works like we planned, tweak any bugs, and ensure that when the Dapp hits the masses it performs like a BOSS.

Full Platform release by February

We plan to release the full platform by February at the latest, although we are well ahead of schedule and may reach this goal a lot sooner based on time available and community support.

Development begins on second and third flagship Dapps in March

Two more amazing Dapps have already been brainstormed and ready to be brought to reality. First we will see how our platform runs and make sure everything runs without problems, and then we start dishing out more dapps!

Boss Token Info (BOSS) Trc-20

Boss Token will be the ecosystem token for the Boss Gaming platform; all token mechanics are built into a smart contract. Here's how it will be distributed.

- 20,000,000 Total Supply
- 2,000,000 minted for each Dapp for presale to distribute tokens.
- After 10 Dapps have been deployed, the entire supply of Boss Token will be circulating
- A TronTrade listing is the first exchange priority after platform launch, this will be funded by presale.

Boss Token Presale Information

Presale will be launched before each Dapp release, 2,000,000 tokens per launch, until all 20,000,000 have been distributed. VIP's will have a 25k buy limit per wallet, as opposed to a 10k limit for all other users. VIP's will have a 5 day window to buy BossToken, and then will be opened to the general community. Tokens will be distributed as such.

- 85% available for sale
- 10% for Development team
- 5% partners

Dapp Fund Distribution

TRX Distribution for Boss Royal go as follows.

- 70% between the top 10 players. (exp and 25trx per kill)
- 10% to Boss Token Holders
- 10% distributed as daily divs for frozen (bullet tokens) the in game currency
- 5% builds up to be distributed to all players as a season reward
- 4% for developers and Dapp management
- 1% for DST token buy ins, (see Dappstats section for more info)
- Also, 25% of funds generated from Presale event will be fed into the dapp to sustain a healthy game environment as we grow the community.

Boss Royal Sponsors

Every Round, has the option for any other Dapp platform to sponsor the match, by paying a TRX fee. Said platform will be advertised and linked for users to visit, as well as also having a sticky link set for the Dappstats referral program! See Dappstats section for more information. Sponsor fee will start and 1000trx and scale with the popularity of the platform, and will be governed by the same principal fees as traditional buy ins to the game.

Dappstats.com Partnership:

Dappstats.com is a new and upcoming Dapp listing website, that has changed the game in community involvement, marketing, and accurate web statistics. Typically, sites like Dappradar offer a service for persons to search for new Dapps, and look up information on them. These sites make tons of money off there viewers and return nothing back to the people. With Dappstats, they have taken the next step with tokenizing analytics. Now shares, abbreviated, DST can be bought and frozen to take part in daily revenue shares based on the websites income. Users now work together through the websites referral link, allowing a community of fish to take on whales in many competitions like referral rewards, or gambling competitions on casinos. All the revenue generated and won, directly proffits the entire community! Dappstats is catching popularity quickly, and payouts are increasing on a weekly basis, it is advised to check it out and partake all the tools offered, especially before Boss Gaming goes live and our partnership is underway!

What does this mean for Boss Gaming? Creating value! Adding Sustainability!

1% of all wagers made on Boss Gaming will go towards the Dappstats.com partnership and buy DST tokens that will be staked on behalf of our platform. 100% percent of all revenue generated from this stake will be added to the Boss Gaming dividend pool solely for the benefit of our users. So for every 1 million TRX wagered, 10,000 DST will be bought and staked. What this means for us, is we have outsourced income from a location other than our players. So down the road, even when all tokens have been mined, and even if no one plays boss gaming anymore, there will be income fed into the dividend pot, forever. How many others can say this? ;) Also, 100k DST has already been frozen on behalf of Boss Gaming and Is already collecting divs!

Token Integration

Boss Gaming has already been looking into other tokens to make available for use on the platform. We have already been working with both Void, and Frag token, and are proud to say that we will be integrating both tokens for play in boss royal by season 2. Season 1 will be a trx only round to keep things simple as we play our first season of the Dapp. Things won't end there, given the allure of PVP gaming, were going to be allowing more and more tokens to be wagered in the hopes to open up our user base to a larger audience, and also promote more activity in the entire tron ecosystem.

Summary

Here at Boss Gaming, We will strive to offer a fresh, new gaming experience; to offer the most sophisticated PVP gaming Dapps available on the tron blockchain. We will focus on sustainability, scalability, security, and developing services that create value, so that we can support our communities trust, and personal investment. Our goals are set extremely high, and we plan to release even more features to support our vision in the near future. We look forward to our official release, and wish everyone the best of luck on our platform!

May skill, always be by your sides,

Boss Gaming Team
